### **DETAILED ACTION**

The preliminary Amendment filed on March 26, 2004 is acknowledged. Claims 1-15 were cancelled, and claims 16-21 were added.

#### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose or render obvious the claimed combination of a method of compensating for atmospheric pressure occasioned by changes in altitude of a powered land vehicle including steps of:

*"providing a supercharger to create boost air and supply the boost air to a turbocharger inlet, and varying the boost air supplied to the turbocharger in response to the atmospheric pressure variations occasioned by changes in altitude of the powered land vehicle so that the level of air pressure at the turbocharger inlet remains substantially constant."*

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### ***Conclusion***

The IDS (PTO-1449) filed on March 26 20, 2004 has been considered. An initialized copy is attached hereto.

In the IDS, applicants cited two prior arts having the same Patent Number **5,771,868**; but their Patent Date and their inventor's name are different.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 3748

- McInney (US Patent Number 4,476,682) discloses a turbocharged internal combustion engine having an altitude compensated boost control and method for its operation.

- Pfluger (Patent Number 6,378,308 B1) discloses a turbocharged internal combustion engine.
